

Q3 ADAPT Retention Review

Prepared for the ADAPT working group.

Day-30 retention across the sample titles averaged 24.8 percent in Q3, up 2.1 points from Q2. The strongest title reached 31.4 percent.

The weakest trailed the sample at 18.2 percent.

Cohort Detail

New-player cohorts acquired through paid social retained at 19.6 percent, versus 29.9 percent for organic installs.

Cross-label blocked sessions represented 1.2 percent of rows and were excluded from the gold aggregates.

Recommendations

Shift 15 percent of paid social spend toward organic channels.

Instrument session-duration nulls in silver_gameplay_activity.

Re-run the evaluation suite after the October model update.
